SUMMARY

Senior/Staff Infrastructure Engineer with 13+ years of experience in cloud computing, automation, and CI/CD pipeline management. Deep expertise in AWS, Kubernetes, Docker, Jenkins, Terraform, Ansible, Helm, Python, and Git. Proven track record designing scalable, secure, and highly available cloud infrastructure, building reusable Infrastructure-as-Code modules, and leading automation initiatives. Currently expanding into AI-powered DevOps workflows and agentic systems.

SKILLS

Cloud	AWS (EC2, VPC, RDS, IAM, S3, CloudWatch, CloudTrail, Route 53, Auto Scaling, CloudFront, Lambda, SageMaker)
IaC & Automation	Terraform, CloudFormation, Ansible
Containers	Kubernetes, Docker, Helm
CI/CD	Jenkins, GitHub Actions
Monitoring	Prometheus, Grafana, ELK Stack
Languages	Python, Bash
Version Control	Git, GitHub, BitBucket
Operating Systems	Ubuntu, CentOS, RHEL, AIX

EXPERIENCE

Digital Engineering Sr Staff Engineer — NTT DATA

March 2022 – Present | Hyderabad, India

- Executed DevOps projects optimizing infrastructure deployment pipelines across core and managed systems.
- Built and optimized CI/CD workflows using Jenkins and GitHub Actions.
- Administered and refined AWS infrastructure (EC2, VPC, RDS, IAM, System Manager, Transit Gateway) for scalability and security.
- Implemented reusable Terraform modules adopted across multiple projects, reducing development time.
- Led code reviews and infrastructure automation initiatives.
- Migrated on-premises workloads using AWS Migration Services; implemented AWS Landing Zone governance and security baselines.
- Designed networking architecture using VPC, Route 53, and Transit Gateway; provisioned infrastructure via Terraform and CloudFormation.

Senior Systems Administrator (SRE) — JPMorgan Chase

June 2017 – February 2022 | Hyderabad, India

- Designed and implemented CI/CD pipelines using Jenkins to support weekly release cycles.
- Automated infrastructure provisioning using Terraform, integrated with Jenkins pipelines.
- Managed container orchestration using Kubernetes and Helm for reproducible, scalable deployments.
- Configured monitoring and alerting with Prometheus and Grafana; managed centralized logging with the ELK stack.
- Automated cloud infrastructure activities and disaster recovery drills; provided on-call support and root cause analysis.
- Supported cloud migration initiatives and implemented hybrid environment strategies.

Server Support Specialist — IBM India Pvt Ltd

February 2012 – June 2017 | Hyderabad, India

- Managed virtualized server environments spanning multiple data centers.
- Migrated business applications to cloud-based platforms.
- Automated server provisioning and configuration management tasks.
- Streamlined patch management, reducing vulnerabilities and downtime; conducted regular vulnerability assessments.

EDUCATION

MBA (Master of Business Administration), Computers — Madras University

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate
- AWS Certified Solutions Architect
